## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14, drawn to a thin film of sol-gel, classified in class 430, subclass 270.16.
  - II. Claim 15, drawn to a method for forming a photosensitive sol-gel, classified in class 430, subclasses 270.16, 290.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the thin film of a sol-gel could be prepared in which all regions of the film have the same index of refraction as is conventional.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1752

5. A telephone call was made to Herbert Shapiro on 9/25/2001 to request an oral election to the above restriction requirement, but did not result in an election being made. It appears that this application is now being prosecuted by a different firm, however, Mr. Shapiro is presently the attorney of record and will be until a change of the power of attorney and change of address is filed in the application.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
